

The proposal to give low power FM broadcast service priority over current FM translator service needs to be discontinued. In Idaho Falls, I receive FM broadcasts from two FM translator services--KCIR and K-Love. Both of these services I find of great value to me as a resident of Idaho Falls to the extent that I provide monthly financial support to both stations. Also these services are not provided by any other broadcast service in this community. further, there is not a proposed replacement for these services thus your proposal adversely effects me and many other listeners in this community. The services provided by these two FM translator stations has very high interest and value from me and others in this community.

Discontinue your proposed action.

Respectfully,

Donald Vernon
